FREE selections available

These results reflect a strategy of withdrawing profits after each trading day based upon a \$5,000 bank and a maximum of 1% of the starting bank wagered on each selection. When available and providing the bank is greater than the initial START bank, profits are withdrawn. The wager is adjusted at the start of each trading day. Although we trade on Betfair, the prices displayed are the average of 3 totes.

Contact us to find out what would have happened under different scenarios. Just let us know your bank size and preferred % of bank and we will send you the 'What If' for your preferred approach.
